

Proving via app an unbroken cold chain according to European - Datalogic

Verify and prove an unbroken cold chain, with temperature data always available. Secure the quality of the goods with a unique solution for the Cold Chain Logistics.

Verify and prove an unbroken cold chain, with temperature data always available. Secure the quality of the goods with a unique solution for the Cold Chain Logistics.

Learn how a single app combined with [Datalogic Memor™ 10 PDA](#) can boost both capacity and efficiency to perfectly meet the increased consumer demand for quality and speed of delivery.

The app easily converts surface temperature to the actual core temperature, compliantly with European standards.

All data are digitally saved - and always available.

The emergence of biologics combined with precision medicine breakthroughs has driven the medical and pharmaceutical industries' greater reliance on the cold chain.

[Cold chain demand is rising](#) - leverage best-in-class technology to be ready.
